

Fact Sheet 5

Recreation and Tourism

Recreation is an important part in the daily lives of residents in the municipality and is increasingly becoming an integral part of the local economy.

What We Heard

When asked what makes the community a great place to live, the natural environment was top of mind with access to nature, trails, parks and open spaces, as well as the rural atmosphere and sense of community, taking the top spots.

Respondents expressed their desire to see public access to trails and beaches preserved and enhanced, especially in relation to development.

We heard specific feedback about challenges in Ballantyne's Cove, including a lack of electrical infrastructure from the Cove to Cape George Point. Due to the interest in tourism in this area, there is a desire to see this infrastructure developed. Respondents also want to see view planes in this area protected, as it is seen as a "Mini Cabot Trail".

Other recurring themes that came up during engagement include active transportation facilities and balancing tourism with quality of life for residents.

What is Being Proposed

The proposed planning documents introduce the **Commercial Recreation Zone** to enable and facilitate the growth of indoor and outdoor recreation in the municipality. This includes accommodations, adventure parks, golf courses, bowling alleys and other recreational facilities.

RV Parks and Campgrounds

There has been major growth in the region when it comes to RV Parks and Campgrounds, and while these uses have many potential benefits to a community, they can also have negative impacts on neighbours. With this in mind, RV Parks and Campgrounds are permitted within the Commercial Recreation Zone by Site Plan Approval. This process provides additional oversight and requires the development to meet certain evaluation criteria that limit the impact on surrounding properties.

*Campground means a plot of ground upon which **two or more campsites** are located, established, or maintained for occupancy by camping units as temporary living quarters for recreation, education, or vacation purposes.*

Policy 4-35: Council shall, through the Land Use By-law, include within the definition of “campground” the use of land for more than one RV for the purpose of providing accommodations

Tourism Accommodations

The approach taken in the draft planning documents enables tourist accommodations in ways that balance the importance of such accommodations within the wider housing spectrum.

- Tourist accommodations can be permitted as a home-based business on residential properties where the business owner has their primary residence. Up to five sleeping units are permitted on a lot as a home-based business in most residential zones.
- Standalone tourist accommodations, where the property is not the businesses owner’s primary residence, are permitted in zones that are focused on commercial uses.

Existing commercial tourist accommodations that do not align with the proposed zoning but are legally operating prior to the adoption of these planning documents would be permitted by the *Municipal Government Act* to continue as a “non-conforming use”.

Please note that any tourist accommodation, whether existing or new, is required to be registered with the Province under the *Tourism Accommodation Registration Act*.
